

# Supplier Onboarding Module

When working with new suppliers, enterprises often encounter bottlenecks and inefficiencies during the onboarding process, including mitigating third party risk and ensuring global and local compliance.

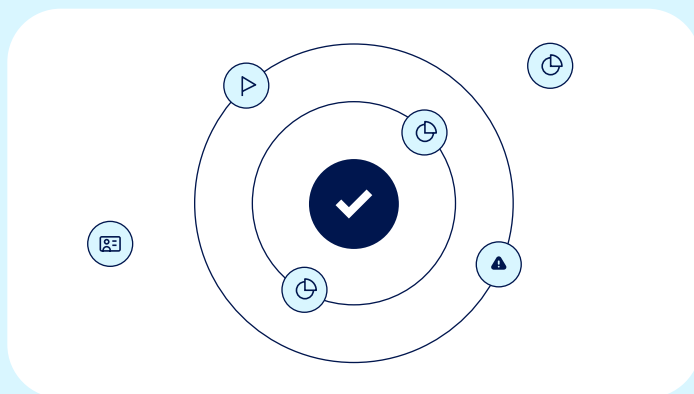

Moreover, onboarding new suppliers into a business's supply chain or procurement system introduces innumerable operational challenges and complexities, such as gathering necessary documentation, assessing supplier capabilities and reliability, remaining compliant with regulations and standards, and establishing accountable working relationships.

Certa's Supplier Onboarding module streamlines the end-to-end supplier onboarding process by minimizing delays, reducing cost, and enhancing collaboration.

## How does Certa's Supplier Onboarding module work?

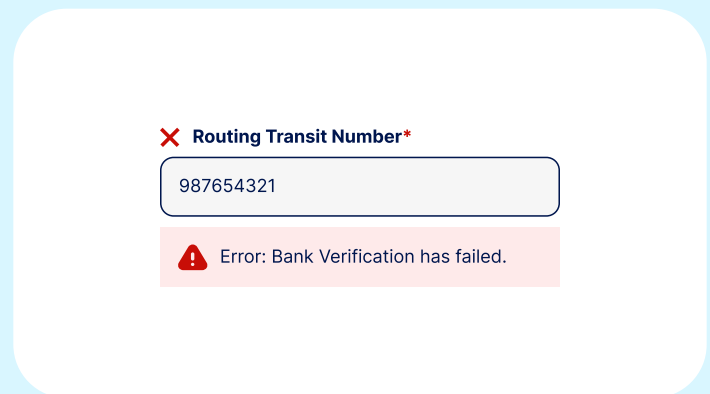

Certa's best-in-class module – built based on best practices and insights from Fortune 100 companies – directly integrates into the platform, Certa Studio, and gives you a simple, consolidated view across the end-to-end process including intake forms, compliance risks, global tax & banking verifications, real-time contract statuses, and more – all while seamlessly integrating into your existing processes and ERP systems.

## Why Certa?

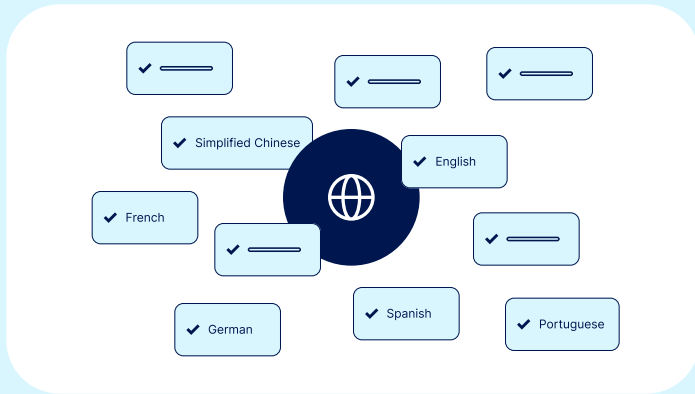

### End-to-End, Panoramic View

View the entire supplier onboarding process through a single-pane across intake, risks & flags, global tax & banking verifications, and contract statuses.

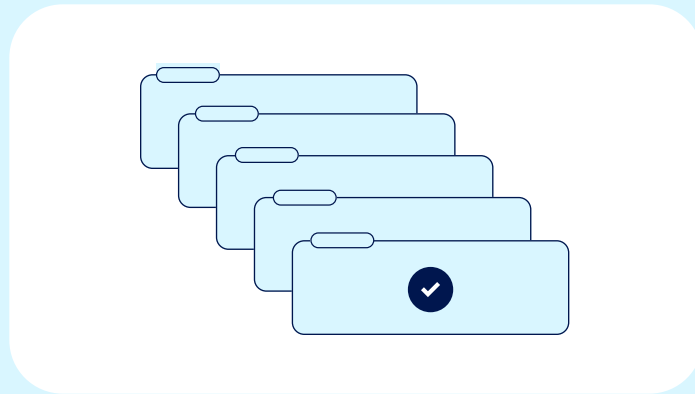

### Reduce Payment Rejections by 95%

Get live tax and banking verifications as your supplier is registering so you can reduce fraud and payment rejections.

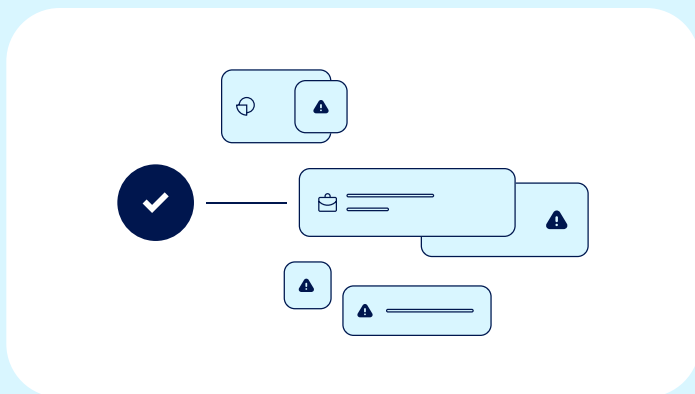

## Onboard in 41+ Languages

Create global consistency throughout your supply chain by onboarding your suppliers in localized languages, and route tasks to your teams no matter where they are.

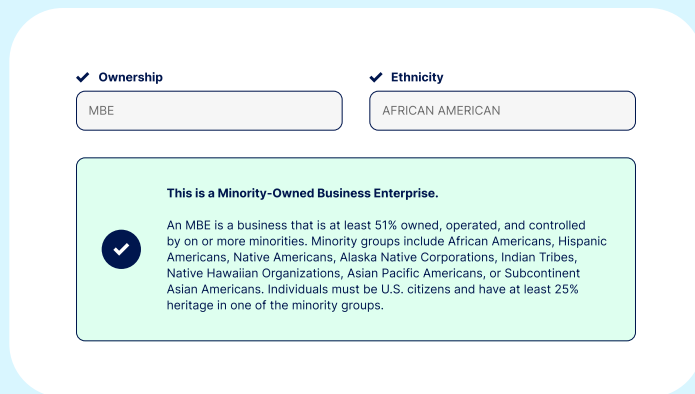

## Extensive Duplicate Checks

Eliminate unnecessary processes by searching existing, preferred suppliers before electing to onboard a brand new one.

## Visibility & Control of Risks

Gain visibility and control of the categorized third party and compliance risks associated with your suppliers.

## Understand Suppliers' Diversity Statuses

Support your organization's diversity goals by understanding your supplier's diversity status.

Certa is an AI-powered workflow automation platform that makes it easy for businesses to manage the lifecycle of their third-parties. Certa's powerful workflow engine enables businesses to streamline processes, eliminate bottlenecks and inefficiencies, and break down silos via interdepartmental and internal/external process participants. Certa's rapid-integration modules allow clients to easily modify and customize their workflows to keep up with their evolving business needs. Certa can stitch together 100+ enterprise systems and data sources along with an organization's legacy tech, creating full spectrum Compliance and Risk management and a single source of truth.
